Hi Everyone!
Hope your semester is going well. I have large classes this year and we are off and running. Math is a challenge for many of my students. They are working hard though I would like to invite any or all of you to visit during the referenced "Computer WME Project" time I have scheduled in the table above for Monday through Thursday this upcoming week or Tuesday October 5th of the following week. The students are going to get their first opportunity at hands on computer math and I am excited about the pages you have made available to them...
so please come in and see what they are doing with it.
Remember - I have moved. I am in Room 107 - downstairs and all the way down the corridor viewed when you come in the front doors at Kimpton.
